

Phil -

These are State lead RIFS sites. DER should be provided w/ copies of PRP Search results (State was contacted for info during search). No PRP Search has been done yet for Voortman.

Per Mike Steiner, State has new info re Berks Sand Pit (ie other possible sources of waste). Most of info is with TWIT at this time. This site was listed as PRP Search completed because at the time no source of waste was found.

Mr. Bruce Smith, Chief  
Hazardous Waste Enforcement Branch  
United States Environmental Protection Agency  
Region III  
6th and Walnut Streets  
Philadelphia, PA 19106

Dear Mr. Smith: *Bruce*

I recently discussed with Kathy Hodgkiss of your staff, the possible implementation by EPA of responsible party searches for NPL sites currently designated as DER-lead Remedial sites under our EPA/DER Superfund Cooperative Agreement. Kathy thought that funding might exist or soon become available for such activities. For a variety of reasons, DER does not presently possess the resources to carry out extensive responsible party searches to the extent that EPA apparently is capable.

Therefore, I would request that you consider the implementation of responsible party searches for the following NPL sites: Dorney Road Site, Welsh Road Site, East Mount Zion Site, Voortman Farm Site, and Berks Sand Pit Site.

It is our current intention to retain the lead agency enforcement role on these sites, and it is requested that any information gathered by EPA in the proposed responsible party searches be made available to DER for enforcement purposes. Of course, our activities in this regard will be coordinated with the appropriate EPA staff.

I would appreciate knowing your thoughts concerning this matter. If you have any questions, please do not hesitate to contact me.

Sincerely,

*Mike*

Michael R. Steiner, Chief  
Emergency and Remedial Response Section  
Division of Operations  
Bureau of Solid Waste Management
